This unit is presently fitted with a 3 amp fused plug. If this plug is not suitable for your supply, another plug must be fitted in the following manner:-

BLUE: To the small pin marked 'N' or coloured **Black**.

BROWN: To the small pin marked 'L' or coloured **Red**.

If overloaded output power will decay, at which point the unit should be switched off. Having established and rectified the reason for the overload wait for approximately 2 Mins. before turning on again.

These outputs must not be connected in such a way that both wires may accidentally be connected together
